IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD

Application Serial No.	79110931
Applicant	Alfa Laval Corporate AB

Notice of Appeal

Notice is hereby given that Alfa Laval Corporate AB appeals to the Trademark Trial and Appeal Board the refusal to register the mark depicted in Application Serial No. 79110931.

Applicant has filed a request for reconsideration of the refusal to register, and requests suspension of the appeal pending consideration of the request by the Examining Attorney.

The refusal to register has been appealed as to the following classes of goods/services:

- Class 003.
All goods and services in the class are appealed, namely: Industrial cleaning preparations for centrifugal machines, separators, heat exchangers as parts of machines, pumps and valves; cleaning, polishing, scouring and abrasive preparations; cleansers for industrial use, namely, for centrifugal machines, separators, heat exchangers as parts of machines, pumps, and valves
- Class 006.
All goods and services in the class are appealed, namely: Common metals and their alloys; metal storage tanks; metal water tanks for industrial purposes, metal lids for tanks, and valves not being parts of machines of metal or their alloys; pipes and tubes of metal; metal tank lids for use in fluid storage and providing access to cleansing equipment; metal pipe fittings; metal fluid storage tanks, agitators being parts of tanks and metal tank lids all sold as a unit; metal manhole covers; metal pipes and tubes; elbows of metal for pipes; metal pipe couplings and joints, namely, tees, reducers and unions; metal clamps; metal flanges; manually operated valves of metal or metal alloys; parts for the aforesaid goods
- Class 007.
All goods and services in the class are appealed, namely: Packaging machines for sterile and nonsterile packaging; filling machines for packages, namely, for filling bags in box and bags in drum with beverages, food and other substances; washing and cleaning machines for industrial plants and plant process systems, including plant pipes and tanks; machines for industrial tank cleaning, namely, power-operated rotary spray heads, rotary jet heads and rotary turbines; machines for use in the brewery and beverage industry, namely, yeast propagation machines, yeast mixing machines, aeration and de-aeration machines and carbonating machines; machines for biotechnological production of pharmaceuticals, cosmetics and nutraceuticals; strainers as parts of machines for industrial use; margarine making machines; washing and cleaning machines for washing industrial plant process systems; cyclone separators; disk-stack centrifugal separators; fuel treatment separators, namely, fuel separators; centrifuges, namely, desalination separators; centrifuges; industrial horizontal separating machines for the separation of particles in fluids and gas; separating machines and their parts and components for use primarily in food, dairy, beverage and starch industries; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in chemical, petrochemical, and biochemical industries; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in power supply plants; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in marine vessels and engine rooms thereof; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in breweries; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in pharmaceutical industries; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in pulp and paper industries; pumps and valves being parts of machines, and separating machines and their parts and components for use primarily in oil, gas, and off-shore plants, refineries and pollution and waste-water plants; de-aerators for water and their parts and components; centrifugal machines, namely, high-speed centrifugal separators and decanter centrifuges; filters, namely, membrane filters being parts of machines or engines for the food, dairy, beverage, brewery, sugar, starch, vegetable oil, biochemical,

pharmaceutical, chemical, marine, mining, oil and gas, engineering, HVAC, refrigeration, power generation, steelworks, water treatment and waste treatment industries; fuel filters; decanter machines, namely, horizontal separators for separation of particles in fluids and gas; pumps being parts of machines; valves being parts of machines; heat exchangers being parts of machines; hydraulic control mechanisms for machines; de-aerators for water; parts and components for the aforesaid goods

- Class 009.

All goods and services in the class are appealed, namely: Electric control mechanisms for separating machines and valves; electric and electrical operating, control and monitoring equipment, namely, thermal and hygrometric control apparatus; sampling equipment, namely, sampling valves for use in biochemical production, food and beverage processing, dairies, breweries, desalination, power generation, chemical production, petrochemical production, starch production and wastewater treatment; condensers and flow control equipment in the nature of automatic liquid-flow control machines and instruments and their parts and components; computer software programs for high-speed centrifugal separators, centrifugal decanters, valves, pumps, heat exchangers and modules for operating, controlling dosing, supervising, monitoring, checking and measuring; electric switches, thermometers, flow level indicators, and pressure indicators; data processing equipment and computers; electric and electrical operating, control and monitoring equipment, namely, thermal and hygrometric control apparatus; electric and electrical condensers; parts and components of the aforesaid goods

- Class 011.

All goods and services in the class are appealed, namely: Apparatus for heating, heat recovering, pasteurization, steam generating, cooking, boiling, concentration, refrigeration, cooling, drying, ventilation, water supply and for district heating and sanitation purposes, namely, plate heat exchangers and evaporators, spiral heat exchangers, shell and tube heat exchangers, air cooling heat exchangers, and heat exchangers; distillation apparatus; refrigeration tanks; hot water heaters; sterilizing apparatus, namely water sterilizers; desalination plants and equipment, namely, water desalination plants; fresh water plants; water and oil purification apparatus and installations; parts and components and spare parts of the aforesaid goods

- Class 018.

All goods and services in the class are appealed, namely: Animal skins, animal hides; trunks and travelling bags; umbrellas, parasols and walking sticks; whips, harness and saddlery

- Class 021.

All goods and services in the class are appealed, namely: Household or kitchen utensils and household or kitchen containers, namely, drinking glasses, plates, not of precious metal or coated therewith; combs and bath sponges; hair brushes, cleaning brushes for household use and wire brushes, not being machine parts; brush-making materials; articles for cleaning purposes, namely, cloths, rags and sponges; steelwool; unworked or semi-worked glass not for building; beverage glassware; dishes of porcelain and earthenware

- Class 028.

All goods and services in the class are appealed, namely: Games and playthings, namely, board games, dolls, sport balls, toy vehicles, toy tools; gymnastic and sporting articles, namely, golf clubs, golf balls, golf bags, golf gloves; decorations for Christmas trees; playthings designed as small-scale machines and apparatus, namely, toy centrifugal machines, toy pumps, and toy processing systems

Respectfully submitted,
